Productivity

Efficiency

Availability

We work hard every day to develop solutions that increase our customers' productivity, while minimizing lifecycle costs.

Quality

Our PEAQ Promise: Maximum productivity.

6

AQ

Our customers around the world know that MULTIVAC delivers great products and best-in-class services. But why do they come back to us again and again?

It's because they know that long-term productivity is at the heart of every single machine and solution we develop.

Investment costs are an important factor behind any purchase decision, but productivity is key to efficient, cost-effective production over the long term.

It's all about your productivity.

8

Whether you're a small-scale producer for whom flexibility and quick conversion are key, or a high-volume industrial manufacturer who demands maximum availability and a downtime risk of close to zero – what really matters is the actual number of packages you produce.

In other words: productivity.

And this is exactly what the MULTIVAC PEAQ Promise is all about.

**Continuous innovation
for maximum productivity**

**Countless features
to maximize your
productivity**

**Optimized
line solutions**

**Preventive/
Predictive
Maintenance**

**Dedicated
automation
solutions**

**Best-in-class
service and spare
parts supply**

**Comprehensive,
proven product
portfolio**

**Over 60 years
of experience**

**200,000+
machines sold**

**Your reliable
partner – anytime
and anywhere**

How does MULTIVAC maximize your productivity?

The well-known benefits of our MULTIVAC solutions are the key – with continuous innovations such as Smart Services or MULTIVAC Line Control.

Optimized line solutions, countless features to maximize your productivity and, of course, our proven and extremely reliable product portfolio all contribute to you always being a step ahead of your competition.

Our
PEAQ Promise:
For your best
productivity.

Our PEAQ Promise: Maximum efficiency.

10

Beyond your initial acquisition investment, there are many costs that come into play throughout the service life of a typical packaging machine: operational and maintenance costs, material costs, personnel costs, energy costs and, of course, disposal costs.

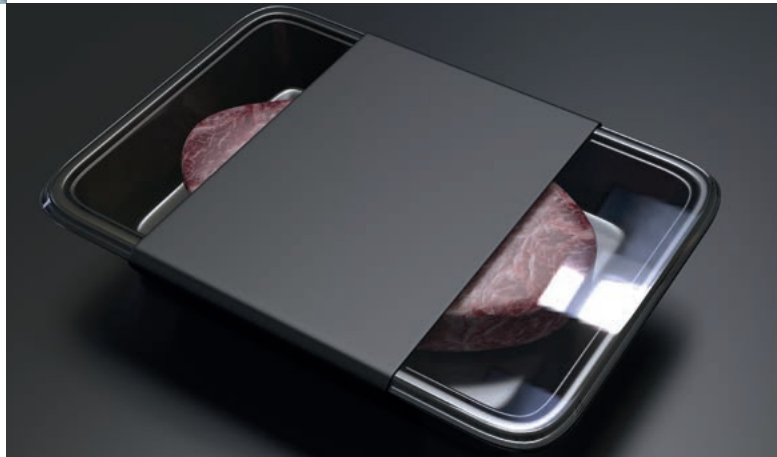

Bearing in mind all these factors and with our focus on optimizing your processes, we can go a long way towards ensuring maximum efficiency – throughout your machine's entire lifecycle.

We make sure that you never lose sight of the big picture.

12 Total Cost of Ownership (TCO) alone doesn't give you the full picture when assessing the value of your asset over time.

Overall Equipment Effectiveness (OEE) is another widely used indicator to help you, as a manufacturer, identify the percentage of manufacturing time that is truly productive.

At MULTIVAC, we've taken the process of identifying real performance a lot further – with productivity, efficiency, availability and quality in the foreground.

Secure your success. With our customized after sales solutions.

MULTIVAC CustomCare After Sales Solutions include a world-class portfolio of state-of-the-art products and services perfectly tailored to your specific needs.

To support you with maximum availability throughout your machines' entire lifecycle – and to save you costs.

Your availability guarantee – MULTIVAC CustomCare After Sales Solutions.

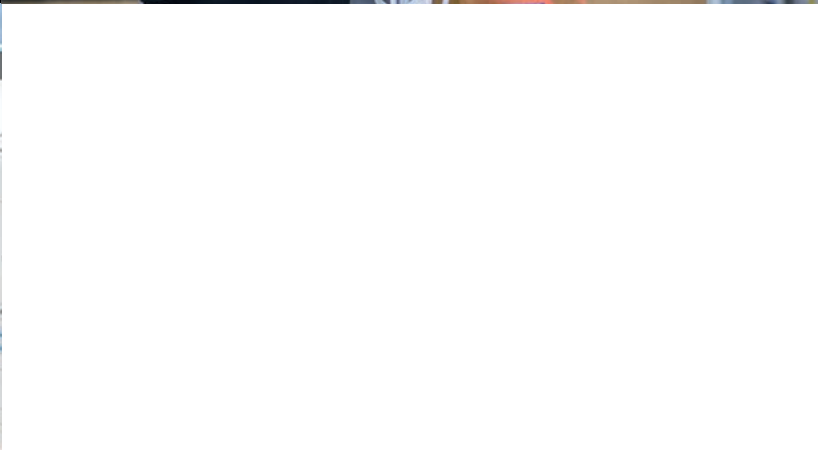

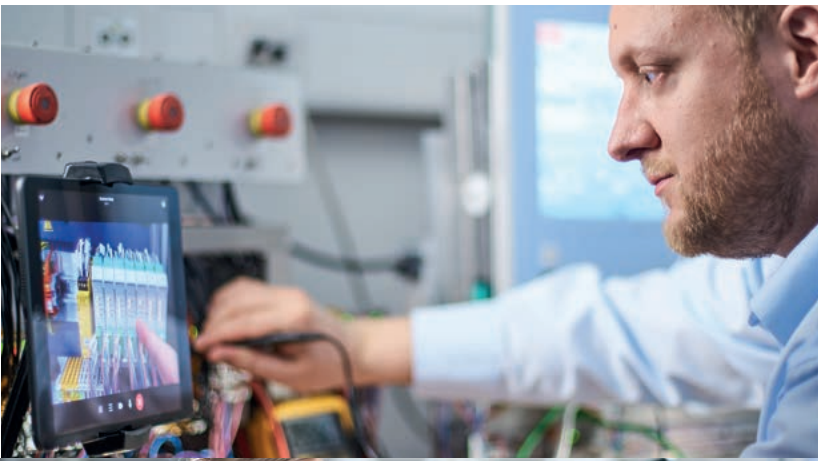

16 Our advanced After Sales Solutions are consistently designed to increase the performance and availability of your machines – in line with your productivity goals.

The MULTIVAC CustomCare portfolio ranges from preventive maintenance contracts to remote support, MULTIVAC Live Support, optimization audits, spare parts, retrofits, our emergency helpdesk, express repairs, and our industry-leading, user-friendly myMULTIVAC customer portal, your access to the MULTIVAC world.

To guarantee your success and 100% satisfaction, more than 1,000 MULTIVAC CustomCare employees are on call 365/24 worldwide.

CUSTOMCARE
Secure your success

Our unique innovations target your maximum productivity.

18 MULTIVAC Line Control (MLC):

MULTIVAC Line Control (MLC) makes the operation of your packaging lines significantly easier and more efficient.

It enables frequently recurring operating sequences to become standardised and reproducible – across lines.

Your operating personnel benefits from fast and error-free sequences: for starting up and stopping the line, recipe changes across lines and emptying the line – as well as from clearly laid-out line status overviews.

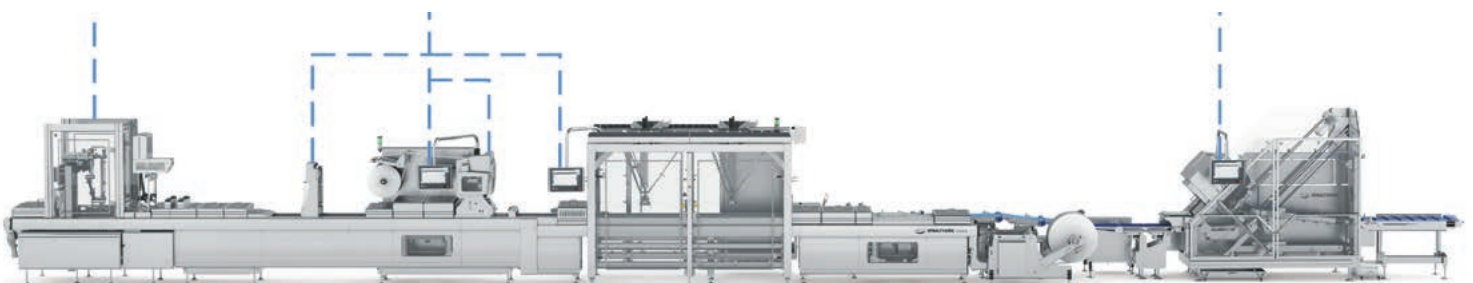

You achieve significantly higher availability of the entire line while minimizing operating errors.

Line start/stop

Line start/stop

Line start/stop

Exclusively with MULTIVAC.

Multi Sensor Control technology:

Many of our machines are equipped with advanced, comprehensive sensor technology. MULTIVAC's Multi Sensor Control feature determines the required process values in closed control loops, recording all relevant process values and continuously optimizing them.

As a result, our machines always work extremely close to their optimum operating point. This contributes to reduced process times, increased process availability and reliability, higher performance and significantly improved output – all to the benefit of your productivity.

MULTIVAC X-line Thermoformer

MULTIVAC X-line Traysealer

Driving the digitalization of products and processes.

20 With our digitalization portfolio, we are adding real added value to our customers' packaging processes. Increased line performance, enhanced machine operation and reduced unplanned downtime are just some of the benefits our customers capitalize on.

MULTIVAC Smart Services

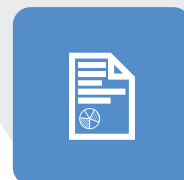

A key facet of MULTIVAC's digital portfolio encompasses real-time analysis tools, such as MULTIVAC Smart Services.

The **Smart Production Dashboard** visualizes key figures of the production process and helps you keep track of the production process.

The **Smart Log Analyzer** uses log data of a MULTIVAC machine to identify the main reasons for unplanned downtime on all connected machines.

Smart Machine Reports provide our customers with entirely automated and regularly generated analysis reports of their machines.

How does your productivity benefit from digitalization?

The **Smart OEE Analyzer** analyzes the effectiveness of packaging processes and provides a concise overview of packaging process performance.

The **MULTIVAC Pack Pilot** enables automatic machine configuration for new articles and allows MULTIVAC X-line packaging machines to be set up without in-depth expert knowledge.

Smart Data Backup automatically saves all recipe changes. It enables automated backup and easy recovery of machine settings, as well as secure storage that can be accessed any time.

With digital products and services from MULTIVAC, we provide our customers with innovative, future-proof solutions for monitoring, controlling and optimizing production – networked and comparable across locations.

Transparent processes and real-time process data make an indispensable contribution to the availability, efficiency and cost-effectiveness of packaging systems and lines. Simply, conveniently and “live”.

Our
PEAQ Promise:
For your best
availability.

Our PEAQ Promise: Maximum quality.

22

MULTIVAC is one of the world's leading suppliers of superior, proven packaging solutions for a wide variety of foods, life science and healthcare products, as well as consumer and industrial goods.

Outstanding quality and your full satisfaction are intrinsic to everything we do.

Let us empower your success.

Our proven portfolio encompasses an extensive range of packaging technologies, automation solutions, and labelling and quality control systems. Our offering is rounded off by solutions upstream of the packaging process: in the areas of portioning and processing as well as baked goods technology.

Thanks to our comprehensive line expertise, all MULTIVAC modules can be integrated into holistically designed systems. Thinking and acting sustainably, we are dedicated to the responsible use of resources and energy.

The MULTIVAC Group employs some 6,900 people worldwide. The company is represented on all continents with over 80 subsidiaries. More than 1,000 consultants and service technicians support our many customers around the globe. Their know-how and experience ensure maximum availability of all installed MULTIVAC machines.

MULTIVAC is part of the R-Cycle initiative across all its companies. The common objective is to drive the loop system for plastic packs forward, based on an open and globally applicable tracing standard.

MULTIVAC supports the Blue Competence initiative of the Association of German Machinery and Equipment Manufacturers (VDMA).
