

Integrated Laser Marking Solution

Creating Perfect Packages without Marking Consumables

The Videojet® laser is seamlessly integrated into the MULTIVAC thermoforming packaging machine, creating a solution that delivers top-notch package quality, efficiency, and productivity. This solution showcases the capability of one UV laser to mark multiple tracks of packages, with washdown ratings up to IP65, and without the mess and costs associated with ink and printer ribbon.

VIDEOJET® 7920 UV Laser Marking System

Discover a smart UV laser marking solution with seamless integration, superior code quality, and a unique Videojet SourceSecure™ warranty for unmatched production reliability.

Providing the Right Solution: Integrated for Customer Success

Developed through close collaboration between the MULTIVAC Group and Videojet®, this fully integrated laser solution delivers the highest level of operational safety, thereby contributing to the long-term success of their production lines.
